

What is claimed is:

1. A one-piece molded clamp comprising:
  - a) a first jaw having an inward facing surface, an outward facing surface, a first end, and a second end;
  - b) a second jaw unitarily formed with said first jaw, said second jaw having an inward facing surface, an outward facing surface, a first end, and a second end;
  - c) at least one notch in said outward facing surface of said second jaw; and
  - d) a tension strap unitarily formed with said first jaw said tension strap having at least one through-aperture through which said second jaw is able to pass, said tension strap is able to be releasably engaged with said at least one said notch upon passing said first end of said second jaw through said aperture.
2. The one-piece molded clamp of Claim 1 further comprising at least one protrusion on said inward facing surfaces of said first and said second jaws.
3. The one-piece molded clamp of Claim 2, wherein said at least one protrusion is unitarily formed with said inward facing surfaces of said first and second jaws.
4. The one-piece molded clamp of Claim 1 wherein said tension strap extends from said inward facing surface of said second jaw.
5. The one-piece molded clamp of Claim 1 wherein said second ends of said first and second jaws further comprise means to mount said clamp on a surface.
6. The one-piece molded clamp of Claim 5 wherein said surface is a body of a vehicle.
7. The one-piece molded clamp of Claim 1 wherein said clamp is made of a polymer.
8. The one-piece molded clamp of Claim 1 wherein said clamp is made of rubber.
9. The one-piece molded clamp of Claim 1 wherein said clamp is made of a synthetic rubber.
10. The one-piece molded clamp of Claim 1 wherein said clamp is made of EPDM.
